

PHILLIP D. HINTON
VP of Administration

Education:

B.A.S. Technology Management, St Petersburg College

Professional Affiliations:

Sigma Beta Delta [International Honor Society for Business, Management and Administration] – Inducted Member

Urban Search and Rescue Qualifications:

Bracken Engineering [Engineering Response Team] – Administration Coordinator
American Red Cross – CPR/AED for the Professional Rescuer

Professional Certifications:

A+ IT Technician [CompTIA]
Network+ [CompTIA]

Summary of Experience:

Mr. Hinton is involved on many levels within the administration of Bracken Engineering, from business management to network administration to software development. Mr. Hinton has an entrepreneurial background in the Information Technology industry and is active in product development and technology research at Bracken Engineering.

Mr. Hinton is responsible for the management of business operations for Bracken Engineering. Mr. Hinton is also involved in strategic planning and research and development. Additionally, he serves as the Administration Coordinator for Bracken Engineering's Engineering Response Team (ERT). In this role he provides oversight of the operations of the program, including planning activities, deployment support, maintaining program equipment and coordinating member training.

As a software developer, Mr. Hinton oversees the development of Bracken Engineering's industry-leading line of business applications. This includes the company's web site; an intranet site, a client access portal, and several internal mobile and desktop applications. Mr. Hinton designed and developed Bracken Engineering's proprietary client and project database and project management application. This application allows Project Engineers and administrators to track and manage projects and deliverables easily and effectively, reducing turn-around while increasing service quality and customer service.

As a network administrator, Mr. Hinton is responsible for maintaining Bracken Engineering's high availability information network. He supports engineering field office operations and is responsible for keeping information available 24 hours a day to staff throughout the southeast. Mr. Hinton is also responsible for supporting the company's workstations, servers and software applications.

Résumé

Phillip D. Hinton

January 7, 2010; Page 2 of 2

Research:

Through his studies at St. Petersburg College, Mr. Hinton has conducted research in the fields of information security, software development, biometrics and telecommunications. Understanding of these functional areas is vital to his role at Bracken Engineering, Inc. By understanding and applying technology and contemporary theories, Mr. Hinton enables Bracken Engineering to be an industry leader in the structural engineering field.
